# Virtual Mixer Snapshots

It is possible to save the settings of your console in so called Virtual Mixer Snapshots. Please find the saving options at <Mixer name>/Snapshot Options.

## Administrating Virtual Mixer Snapshots.

You can save up to 20 Virtual Mixer Snapshots. These 20 snapshots are listed in the snapshots area of the Virtual Mixer Snapshots tab.

Select a **Mixer Snapshot** from the list to define its options in the **Edit Mixer Snapshot** area. In the **Restrict "Save" to Authorisation groups** list, you see all defined authorisation groups. Select one or more group check boxes to restrict the right to save a snapshot to these users assigned to this group (see [for the setup of users and authorisation groups](#)).

In the **Select Mixers where the Snapshot can be applied** area, you have to assign on which virtual mixers it is allowed to use the selected snapshot.
